SUMMARY

MERN Stack Developer with **4 years of experience** designing and building full-stack web applications using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, including internal tools at Samsung Data Systems and an **AI-powered** support platform integrated with **OpenAI** and **Gemini APIs**. Also experienced in enterprise content management with **Adobe Experience Manager (AEM)**. Proven track record of improving system performance and delivering production-grade features in **Agile** environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Redux, Context API, React Router, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture

Databases: MongoDB, MySQL

AI / Tools: OpenAI API, Gemini API, Prompt Engineering, Git, CI/CD, Docker, Jira, Postman

EXPERIENCE

Samsung Data Systems

Jul 2022 – June 2026

Software Engineer I (MERN Stack & Enterprise Web Development)

Gurugram, India

- Delivered full-cycle feature development and production support for enterprise client platforms, working across the **MERN stack (React.js, Node.js, Express.js, MongoDB)** and **AEM** in an **Agile Scrum** team.
- Built and maintained internal tools and dashboards using **React.js** and **Node.js/Express.js**, including **REST API** integrations with **MongoDB** for data-driven features.
- Reduced API response latency by 25%** and **database query execution time by 40%** through **SQL** and **MongoDB** query optimization, indexing, and backend performance tuning.
- Improved page load time by 30%** by optimizing **AEM** components, client libraries, and digital asset delivery.
- Collaborated with cross-functional teams including QA, product, and client stakeholders to scope requirements, review code, and ship reliable releases using Jira and Git.

PROJECTS

Zendesk Customer Support Platform – Samsung Data Systems

Node.js | Express.js | JavaScript | MongoDB | REST APIs

- Built a customer support platform that lets support agents create, assign, track, and resolve customer tickets in real time, integrated with the **Zendesk API** as the core ticketing backend.
- Implemented features including ticket status tracking, agent assignment, and custom **CRUD** workflows tailored to client-specific support processes and business rules.

Adobe Experience Manager (AEM) Platform – Samsung Data Systems

AEM | Client Libraries | Digital Asset Management

- Built and structured enterprise web pages and components in **AEM**, giving content teams reusable, editable templates to publish and update pages across multiple client sites without developer involvement.
- Managed digital asset workflows (upload, tagging, versioning) within AEM's Digital Asset Management, keeping content and imagery consistent across all published sites.

AI Customer Support Platform (MERN Stack)

React.js | TypeScript | Redux | Node.js | Express.js | MongoDB | OpenAI/Gemini API | JWT

- Built a scalable full-stack **AI-powered** support platform on the **MERN stack** with **JWT-based authentication** and **Role-Based Access Control (RBAC)** to secure user and administrator access.
- Designed **RESTful APIs** and **MongoDB** schemas using **Mongoose**, and integrated **OpenAI/Gemini APIs** with prompt engineering for ticket summarization, auto-reply generation, categorization, and priority classification.
- Built a responsive admin dashboard with real-time chat, ticket management, and analytics reporting using reusable **React** components and **Redux** state management.

EDUCATION

National Institute of Technology (NIT), Jamshedpur

Jul 2019 – Jun 2022

Master of Computer Applications (MCA)
