SUMMARY

Software Engineer with 4 years of experience developing enterprise web applications using JavaScript, PHP, REST APIs, and Adobe Experience Manager (AEM). Experienced in building scalable backend services, implementing CRUD operations, and supporting production applications in Agile environments. Skilled in full-stack MERN development with hands-on experience building AI-powered applications using React.js, Node.js, Express.js, MongoDB, JWT authentication, and OpenAI/Gemini APIs.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), PHP, C/C++, Python (Basic) — **Frontend:** React.js, Redux, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery, AJAX — **Backend:** Node.js, Express.js, Core PHP, REST APIs, JWT Authentication, MVC Architecture — **Database:** MongoDB, Mongoose, MySQL — **AI:** OpenAI API, Gemini API, Prompt Engineering — **Tools:** Git, GitHub, Jira, Postman, VS Code, Chrome DevTools, Zendesk, Adobe Experience Manager

EXPERIENCE

Samsung Data Systems

Jul 2022 – Jun 2026

Software Engineer I

Gurugram, India

Zendesk Customer Support Platform

- Developed and maintained enterprise **customer support applications** using Core PHP, JavaScript, MySQL, and RESTful APIs, implementing **custom CRUD functionality** to support client-specific business workflows.
- **Reduced API response latency by 25%** and **database query execution time by 40% through SQL** query optimization, indexing, and backend performance tuning.
- Resolved production issues and collaborated with **cross-functional teams in an Agile environment** using **Jira** and **Git** to deliver high-quality software releases.

Adobe Experience Manager (AEM)

- Authored and published enterprise web content using AEM editable templates and reusable components while managing digital assets, content workflows, and multi-site publishing.
- **Improved page load time by 30%** by optimizing AEM components, client libraries, and digital asset delivery, ensuring compliance with enterprise quality standards.

AI Customer Support Platform (Personal Full-Stack Project)

MERN Stack — OpenAI/Gemini API — JWT — Tailwind CSS

- **Developed a full-stack AI-powered customer support platform** using React.js, Node.js, Express.js, and MongoDB following MVC architecture and RESTful API principles.
- Implemented **JWT-based authentication** with **Role-Based Access Control (RBAC)** to secure user and administrator access.
- **Integrated OpenAI and Gemini APIs** to automate ticket summarization, intelligent reply generation, ticket categorization, and priority detection.
- **Designed MongoDB schemas using Mongoose** and developed an Admin Dashboard featuring analytics, real-time chat, ticket management, and reporting capabilities.

EDUCATION

National Institute of Technology (NIT), Jamshedpur

Master of Computer Applications (MCA)

July 2019 – June 2022
